Indiana State University
CIMT-657
Introductory Video Assignment

Week 1
Due Date: 11:59 p.m. on Sunday, Aug. 23, 2020
Point Value: Max. 100 points

Learning Objectives (Course and Module Objectives)

You will

- Apply instructional design principles and strategies and professional policies to the web-based courseware design. (CO #1)
- Introduce yourself to fellow learners and the instructor using multimedia.
- Discuss courseware design principles, models, and strategies and their relevance to web-based education. (MO)
- Reflect on prior practices if they had any prior teaching experience. (MO)
- Describe previously applied ID principles and strategies and professional policies in web-based course design. (MO)

Introducing yourself

Introducing yourself with video means creating a video in which you appears on camera addressing your audience i.e. your classmates and your instructor for this class. Videos do not need to be professionally produced or even edited. An introductory video is usually uploaded to the course under the course introduction module discussion, and is accessible by all students in a course shortly after you upload yours.

Characteristics

- Scripted
- Short (2 - 3 minutes)
- Informative
- Personal (Imperfect!)

Facilitation Process

Pre	▪ You scripts content. [Please see the provided script template at the bottom] ▪ You practice content without reading. ▪ You read your materials. (This may include making sure the camera has enough memory/storage, having a colleague record you, choosing a well-lit, quiet space with appropriate background, preparing your wardrobe, etc.
During	▪ You record practice video(s). ▪ Your colleague or you yourself provide feedback on practice video. This step is optional, but highly recommended. ▪ You implement feedback into final recording.
Post	▪ You upload video to the introductory module discussion board.

Beginner Tips for Effective Introductory Videos

- After writing the script, edit your words heavily. The shorter the better. Cut, cut, cut!
- Re-use the script as a transcript that can be posted with the video.
- Familiarize yourself with the script enough to be natural rather than memorizing or reciting it verbatim.
- Maintain eye contact with the camera. Don’t read the script or look away.
- Use your normal speaking speed with just a bit more volume/projection than usual.
- Avoid monotone speaking by remembering to smile, be friendly and conversational, and “punch up” certain words with emotion or enthusiasm.
- If possible, avoid wearing stripes or heavy patterns. Choose solid colors.
- Improve lighting by moving to where the light source is in front of you.
- Time your practice video. Ideally, the final video should be between 2-3 minutes.

Video Script Template

Use this suggested video script template as a guide for the sequence and content of your course introduction or welcome video. Limit yourself to 5-6 sentences per box, with one idea per sentence. Write in a conversational style. This template can also be turned into a transcript to post with your video.

Introduce yourself	
A few comments about your own professional courseware design experience	
Talk about at least 1 principles, theories, models/frameworks, or strategies based on courseware design and development that you know about and its relevance to course building. Also, reflect on prior practices if you have any prior teaching experience	
Close on a positive note!	

Tools to Use

After collecting your ideas and finalizing your script, record your introductory video (include your voice and face) using any tools you are comfortable with. Some examples of the tools that you can use are:

- Animato - https://animoto.com/
- Camtasia - https://www.techsmith.com/video-editor.html
- iMovie (for Mac only) - https://www.apple.com/imovie/
- Or you can just take a video from your phone and upload it in the discussion board!

Reply to your Peers

Reply to several peers in written or video format within the same Introductory Video discussion forum (at least 2 peers) using the PQW method. Write or record about a paragraph (5-7 sentences) as a response. "I agree" type of sentences/thoughts do not count toward your valuable content/sentences. Bring additional ideas to the table, share experiences, advice, resources, or new viewpoints. Be sure to follow the rules of etiquette as outlined in the Syllabus when responding to your peers.

PQW Method:

- **Praise:** What do you agree with, or what did your peer say particularly well?
- **Question:** What questions do you have about your peer's explanation or support? What is not clear?
- **Wish:** What's missing from the post? What do you wish your peer would have added or removed or explained more? Why? What suggestions or resources can you provide to help your peer better approach the topic?

I plan to participate in the forum and reply to a few participants with feedback. You may wish to read or watch my feedback because it may carry value for you too. If you missed something in your post based on someone's feedback, feel free to add another new post to the forum and make up for the missing element.

Assessment & Rubric

Elements I will be looking for in your post/video:

1. **Personal Content** (10 points)
    - Your name, where you live and/or currently work, your job title and/or major, an interesting fact about yourself
2. A few comments about your own **professional courseware design experience.** (10 points)
3. **One principle, theory, model/framework, or strategy** that you know about and its relevance to course building. (30 points)
4. Reflection on any prior teaching experience. (10 points)
5. Video recording includes **voice and face**. (10 points)
    - Either a link or the entire video file can be located.
    - The video length is around 2-3 minutes, but definitely less than 5 minutes. Speaker is clear, concise, organized, informative, and speaks loud enough for peers to understand the comments.
6. **The Video Script Template** is submitted with the video link. (10 points)
7. Replies **to several students** (at least 2 peers) in written or video format using the PQW method. (20 points total – 10 points per each response).
    - Each response is about a paragraph (5-7 sentences) long filled with valuable content.
    - Each post and response follows the rules of etiquette.
