Indiana State University
CIMT-657
Introductory Video Assignment

Week 1
Due Date: 11:59 p.m. on Sunday, Aug. 23, 2020
Point Value: Max. 100 points

Learning Objectives (Course and Module Objectives)

You will

- Apply instructional design principles and strategies and professional policies to the web-based courseware design. (CO #1)
- Introduce yourself to fellow learners and the instructor using multimedia.
- Discuss courseware design principles, models, and strategies and their relevance to web-based education. (MO)
- Reflect on prior practices if they had any prior teaching experience. (MO)
- Describe previously applied ID principles and strategies and professional policies in web-based course design. (MO)

Purpose

Both leaders and employees often deliver speeches in front of teams and larger crowds. Because employers are looking for candidates who have excellent communication, leadership, analytical and interpersonal skills, your first assignment will challenge you to combine some of these elements and demonstrate how well you can express yourself about web-based education topics. The other purpose of this assignment is to establish a working community where members get to know one another and know how to reach out to peers when needed.

Directions

1. In a word processor file, write down your **introduction script** (to remain focused while recording the video) that you will say in your introductory video about yourself (name, where you live and/or currently work, your job title and/or major, and at least one interesting fact about yourself. In addition, share under what settings you have used web-course designing. For example: Have you developed any course? What type of **courseware projects** have you designed, implemented, analyzed, and evaluated? What group was the audience? How successful was the course? How did you access its efficacy?
2. As the second part of the video, talk about at least **5 principles, theories, models/frameworks, or strategies** based on courseware design and development that you know about and its relevance to course building. Also, reflect on prior practices if you have any prior teaching experience.
3. After collecting your ideas and finalizing your script, record your introductory video (include your voice and face) using any tools you are comfortable with. Some examples of the tools that you can use are:
    - Animato - https://animoto.com/
    - Camtasia - https://www.techsmith.com/video-editor.html

- Screencast-O-matic - https://screencast-o-matic.com/home
- iMovie (for Mac only) - https://www.apple.com/imovie/

The video length should be around **8-10 minutes**, but definitely less than 15 minutes. Therefore, be clear, concise, organized, informative, and speak loud enough for your peers to hear you.

4. Post **the link** of the Introductory Video to the Introductory Video discussion forum. Below the video link, copy/paste your **entire script**. The script becomes the transcript that videos need in order to confirm to universal design guidelines.
   Keep in mind that you will have to post your own work before you can see the work of others. If you simply post some blank comment or just a few sentences in order to see others' work (before you post your own video and script), you will receive a zero for this assignment. Do not borrow ideas from others before you post your work.
5. Reply **to several peers** in written or video format within the same Introductory Video discussion forum (at least 2 peers) **using the PQW method**. Write or record about a paragraph (5-7 sentences) as a response. "I agree" type of sentences/thoughts do not count toward your valuable content/sentences. Bring additional ideas to the table, share experiences, advice, resources, or new viewpoints. Be sure to follow the rules of etiquette as outlined in the Syllabus when responding to your peers.

PQW Method:

- **Praise:** What do you agree with, or what did your peer say particularly well?
- **Question:** What questions do you have about your peer's explanation or support? What is not clear?
- **Wish:** What's missing from the post? What do you wish your peer would have added or removed or explained more? Why? What suggestions or resources can you provide to help your peer better approach the topic?

I plan to participate in the forum and reply to a few participants with feedback. You may wish to read or watch my feedback because it may carry value for you too. If you missed something in your post based on someone's feedback, feel free to add another new post to the forum and make up for the missing element.

Assessment & Rubric

Elements I will be looking for in your post/video:

1. **Personal Content** (10 points)
   - Your name, where you live and/or currently work, your job title and/or major, an interesting fact about yourself
2. A few comments about your own **professional courseware design experience.** (10 points)
3. **5 principles, theories, models/frameworks, or strategies** that you know about and its relevance to course building. (30 points)
4. Reflection on any prior teaching experience. (10 points)
5. Video recording includes **voice and face**. (10 points)
   - Either a link or the entire video file can be located.

- The video length is around 8-10 minutes, but definitely less than 15 minutes. Speaker is clear, concise, organized, informative, and speaks loud enough for peers to understand the comments.

6. **The entire script** is submitted with the video link. (10 points)
7. Replies **to several students** (at least 2 peers) in written or video format using the PQW method. (20 points total – 10 points per each response).
   - Each response is about a paragraph (5-7 sentences) long filled with valuable content.
   - Each post and response follows the rules of etiquette.
