Indiana State University
CIMT-657
Discussion Assignment

Module 2
Due Date:
Point Value: Max. 50 points

Learning Objectives

You will

- Develop goals and objectives that are specific, observable, and measurable, and accurately define expected skills and knowledge.
- Evaluate learning objectives for various instructional products.

Directions

First, read all the posted resources for this week. Then,

1. Write the **Course Objectives (COs)** for your course/project. Your course objectives should have a behavior, skill, or action that the learners can demonstrate when they achieve mastery of the objective. Objectives need to be written in such a way that they are measurable by some sort of assessment. Course objectives form the foundation of the class.
2. After the course objectives, write the **Module Objectives (MOs)**. Break down the more complex course objective skills to smaller module objectives. Your module objective should specify a specific, observable behavior, skill, or action in small, discrete pieces. Module objectives can be viewed as the building blocks or tasks that lead students to mastery of a course objective.
3. Finally, also share ideas about the individual projects in a short paragraph so your peers can understand what your course is about.
4. Post the COs, MOs, and the overview of your course idea in the discussion forum. You need to have **at least 3 COs and at least 2 MOs for each of those COs**.
5. Review and evaluate to your peers projects and provide constructive criticism for the course and module objectives.

An example of CO with MOs:

Course Objective 1:	Utilize writing process strategies including invention, drafting, revision, and editing.
Module Objective:	1. Select an essay idea by using brainstorming techniques. 2. Identify characteristics of essays written in Standard Edited American English 3. Format essays and writings assignments according to provided requirements 4. Incorporate elements such as essay introductions, conclusions, transitions, thesis statements, and organization structures.

Reply to your Peers

Reply to several peers in written or video format within the same discussion forum (at least 2 peers). Write or record about a paragraph (5-7 sentences) as a response. Bring additional ideas to the table, share experiences, advice, resources, or new viewpoints as a constructive criticism.

Assessment & Rubric

A-level work – (45-50 points) - Exceeds Expectations – Evidence of extended mastery of all student outcomes/competencies

- The COs and MOs (min 3x2) were drafted correctly and clearly
- Short paragraph explaining the details of the individual project was provided clearly
- Appropriate constructive criticism was offered in a professional manner to at least two of the peers

B-level work – (40-44 points) - Meets Expectations – Evidence of mastery of all student outcomes/competencies

- The COs and MOs (min 3x2) were drafted but minor corrections are needed
- Short paragraph explaining the details of the individual project was provided
- Appropriate constructive criticism was offered in a professional manner to only one the peers

C-level work – (35-39 points) - Developing –- Evidence of partial mastery of one or more student outcomes/competencies

- The COs and MOs (min 3x2) were drafted and corrections are needed

- Paragraph explaining the details of the individual project was short, unclear or not provided
- Appropriate constructive criticism was offered in a professional manner to only one of the peers or is missing

D and F-level work – (0-34 points) - Does Not Meet Expectations – Evidence of limited or incomplete mastery of one or more student; outcomes/competencies or failure to attempt one or more student outcomes/competencies

- The COs and MOs were incomplete or not appropriately written
- Paragraph explaining the details of the individual project was not provided
- Appropriate constructive criticism was not offered at all
