CIMT-657
Discussion Assignment

Module 3
Due Date:
Point Value: Max. 50 points

Learning Objectives

You will

- Describe previously applied ID principles and strategies and professional policies in web-based course design.
- Develop goals and objectives that are specific, observable, and measurable, and accurately define expected skills and knowledge.
- Establish project goals, associated components, and rationale for the ID project.

Directions

In the blackboard discussion board for this week, discuss effective web-design, online education regulations, COI principles, accessibility and copyright.

1. First review this week's resources and materials.
2. Then answer the following questions for each of the topics in 6-8 sentences:
    - **Effective web-design**
        - What are some of the most effective web-design strategies? Explain at least 3 of them in detail.
        - Explain how you are going to use effective web-designs in your course. Explain particulars about the implementation of it in your course.
    - **Online education regulations**
        - Have you heard about online education regulation prior to reading the resources provided? If yes, then explain it and if not, be sure to study them and share your thoughts on these regulations?
        - Write about some of the online education regulations that you think are really important for your course and the impact it will have while you are developing or delivering your course. If you don't teach online, explain what you would do in case you did.
    - **COI principles**
        - Explain your preexisting thoughts on Community of Inquiry (CoI), how you may have expended your previous knowledge, and how will you now implement this in your course.

- **Accessibility**
  - What is your experience related to accessibility in an online course?
  - How are you going to make your online classes accessible? Provide minimum 6 strategies.
- **Copyright**
  - Why is copyright important in education?
  - Identify materials for your course that are copyrighted and/or licensed under Creative Commons (CC). Provide some examples where you have to obtain permission for copyrighted materials or replace them with CC or free materials.

3. Post your work either in a document file or directly in the discussion board.
4. Evaluate your peers' work and compare your answers as you provide feedback.

Reply to your Peers

Reply to several peers in written or video format within the same discussion forum (at least 2 peers) using the PQW method. Write or record about a paragraph (5-7 sentences) as a response. "I agree" type of sentences/thoughts do not count toward your valuable content/sentences. Bring additional ideas to the table, share experiences, advice, resources, or new viewpoints. Be sure to follow the rules of etiquette as outlined in the Syllabus when responding to your peers.

PQW Method:

- **Praise:** What do you agree with, or what did your peer say particularly well?
- **Question:** What questions do you have about your peer's explanation or support? What is not clear?
- **Wish:** What's missing from the post? What do you wish your peer would have added or removed or explained more? Why? What suggestions or resources can you provide to help your peer better approach the topic?

Assessment & Rubric

A-level work – (45-50 points) - Exceeds Expectations – Evidence of extended mastery of all student outcomes/competencies

All the required questions are answered regarding effective web-design, online education regulations, COI principles, accessibility and copyright clearly and to the point with the relevancy to the course in 6-8 sentences each. Also, replied to at least 2 of your peers with 5-7 sentences of reply.

B-level work – (40-44 points) - Meets Expectations – Evidence of mastery of all student outcomes/competencies

Answered the required questions regarding effective web-design, online education regulations, COI principles, accessibility and copyright with the relevancy to the course but some components are not thoughtfully written or you have replied to only one of your peers with 5-7 sentences of reply.

C-level work – (35-39 points) - Developing –- Evidence of partial mastery of one or more student outcomes/competencies

Answered only 3 questions regarding effective web-design, online education regulations, COI principles, accessibility and copyright with the relevancy to the course and may have only replied to only one peer.

D and F-level work – (0-34 points) - Does Not Meet Expectations – Evidence of limited or incomplete mastery of one or more student; outcomes/competencies or failure to attempt one or more student outcomes/competencies

Answers are limited in content for most of the required questions regarding effective web-design, online education regulations, COI principles, accessibility and copyright with the relevancy to the course and not replied to any of the peers.
